7stage

water purifier

Bacteriostatic
Bacteriocidal
Disinfectant

Enjoy the clean, clear water anywhere you go!

Our Company History

In 1975 our filter company revolutionized the filtration industry by making the first porous plastic water filter cartridges in India. Our first filter and every filter since, was designed to eliminate contaminants that cause unwanted taste, odour & discoloration in potable water from this simple concept of "**better tasting water**".

Water Technology Of The 21st Century! Filtration Combined With Ionisation

Our filter company has grown & developed the Patented Countertop 7-stage Water Purifier Series, which are designed to provide **Bacteriostatic-Bacteriocidal-Disinfectant** Purified water. In addition to disinfection it provide filtration for the removal of sediment & chemical contaminants. This system is ideal for kitchen, wash-basin, laboratories, offices, dispensary & outdoor use.

Model 100CTWB Countertop 7-stage water purifier utilize **Purification Resin** to make your water microbiologically pure . NASA-U.S.A. [National Aeronautics and Space Administration] has used this resin technology since 1981 to kill a wide range of bacteria, germs, viruses and other harmful micro-organism for the U.S.astronauts during each space shuttle mission.This unique purification technology is based on the natural phenomenon of **Electrostatic Ionisation Attraction**.

80% Of All Diseases Are Caused Due To Unsafe Drinking Water

Unsafe drinking water is one of the leading health challenges in the world today. More than one billion people do not have access to safe drinking water and 80% of all diseases in developing countries are transmitted through water. Even within major metros where water is claimed potable, water systems are unsafe and cannot be drunk, atleast with confidence from taps.

Safeguard Your Health From Waterborne Diseases While Travelling

Water quality can vary from city to city within a country, utilizing a water purifier is a first step in protecting yourself. In addition to waterborne pathogens, micro-organism that cause diseases or unsanitary conditions can also cause gastrointestinal distress among travellers.

Obtaining safe drinking water can be a difficult choice for travellers and while travelling, people drinks lots of water, is important for staying fit, and much of the available water is not fit to drink. In developing countries like ours, local mineral water bottle is suspected , the water is only as good as the product that goes in the bottle.

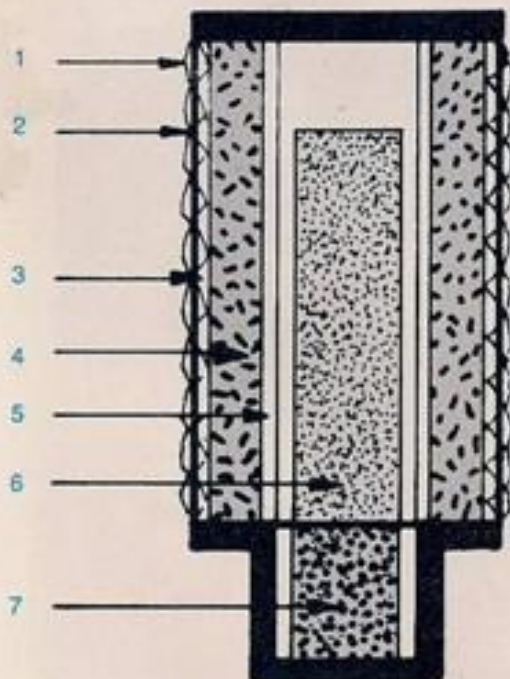

The Single Solutions For All Your Water Problems!

Boiling unsafe water is an effective measure but it is not at all practical. 7-stage purified drinking water is treated at the point-of-use as you need it, not days, weeks or even months before.

7-stage always have refreshing, sparkling clean, delicious drinking water right at your kitchen for all of your consumable water needs - drinking, cooking, ice, beverages, food preparation etc. which is less expensive with the maximum performance, safety and convenient.

Drinking safe water from Countertop 7-stage Water Purifier System will ensure the Bacteria / Germ free water which comes with a one year warranty.

Advanced State -Of -The-Art Most Effective 7-stage Water Purifier Complete Water Treatment System

- **First Stage**
Outer netting provides impact resistance.
- **Second Stage**
Prefiltration wrap provides extended sediment, dirt holding capacities .
- **Third Stage**
Carbon Block - silver/iodised - candle - "Bacteriostatic".
- **Fourth Stage**
Mixed Bed "Bacteriocidal".
- **Fifth Stage**
Microporous candle - removes trace of micro-organisms escape from the above stages.
- **Sixth Stage**
Purification Resin - " Disinfection".
- **Seventh Stage**
Process Media - Removes residuals

Technical Specifications

| | |
|--------------------------------|---|
| Recommended outflow rate | : 2 LPM (Max.) |
| Replacement Purification Resin | : 5000 Ltrs. |
| Dimension (LxWxH) | : 125 x 100 x 210mm |
| Net Weight | : 725 gms |
| Tap attachment | : Universal collet (Any size of tap) |
| Water Pressure | : Min 0.2 kg/cm.sq. Max 3.00 kg/cm.sq. |

(Note : Person with thyroid problems & pregnant women should consult their doctor before use.)

Countertop 7-stage Water Purifier Is Your Best Choice!

1. Seven stage of filtration in a single cartridge.
2. Silver / Iodised carbon block technology.
3. Removes most of the sediments.
4. Reduces unpleasant tastes and odours.
5. Reduces iodised residuals.
6. Longlife - cartridge of normal use.
7. Easy to clean without hassle.
8. **Kills water borne bacterial contaminates and reduction of pathogenic cysts such as Giardia.**
9. 5000 litres usage before replacement of purification resin is required.
10. Self-replacable. Quick change technology cartridge in seconds.
11. Attaches to any water tap with universal tap collet in seconds.
12. 7-stage is certified and recommended by medical and scientific organisation.
13. Ideal for kitchen, wash-basin, laboratories, offices, dispensary and outdoor use.
14. Do-It-Yourself installation require's no tools.
15. No plumbing and electrical work required.
16. Multi-positional spout.
17. Slim - line design.
18. Makes an ideal gift item.
19. Packed in suitcase or take in a carry bag.
20. Available in different model with attractive colours.
21. Variety of filter cartridge to meet all domestic requirements.
22. Use of Release Valve :
 - Helps in maintaining an uniform flow of water by flushing out air and water and gives proper cartridge contact.
 - Flushes out the stored water retained in the purifier after use, thus preventing formation of bacteria.
23. Patented housing design & cartridge technology.
24. One year Warranty [Except Conumables]
25. **Technology of the 21st century product with reasonable price.**
